WORK EXPERIENCE

Senior Frontend
Engineer
March 2024 - March 2025

DALEE

Dalee: an Internet agency that develops
websites.

I work as a Middle+ in a team with two more
Frontend developers.

Responsibilities:
• Support and development of websites and
promo pages of various complexity from scratch
• Creating animations with Lottie, and based on
PNG sequences
• Redesign and development of new pages, code
refactoring
• Adding metrics to projects, in particular,
Yandex.Metrica

Stack: Vue 3 | Pinia | HTML | SCSS | TypeScript

Client: <https://sbermobile.ru>

Senior Frontend
Engineer
January 2024 - March 2024

GAZPROM-MEDIA

I was invited to this position at a difficult time for
one of the company's projects: all the dates of
the team on the official website
(<https://www.gazprom-media.com/ru>) were
overdue, a large number of tasks were on fire
and they could not cope with the load. Plus, I
needed help supporting the official TNT website.

Accordingly, I agreed to get a job for a relatively
short period of time, to strengthen the team in
order to rectify the situation in a short time and
immediately after that leave in search of another

Yes

place, since I was looking for a slightly different type of company.

In addition to strengthening, I was engaged in other smaller projects, promo pages, etc.

Responsibilities:

- Support and development of websites and promo pages of varying complexity.
- Redesign and development of new pages, code refactoring

Stack: Nuxt 3 | Pinia | TypeScript | HTML | CSS | SCSS

Projects:

| <https://www.gazprom-media.com/ru>
| <https://tnt-online.ru>

Team Lead Frontend
Engineer

August 2020 - January 2024

Cyberia

Cyberia: a company engaged in custom web development

I started in the company as a React developer and worked in this status for several months.

Then I expressed a desire to develop a Vue-development branch in the company and smoothly became the main Vue-developer. Thanks to my efforts, the Vue department grew quite quickly and became the most profitable and had the largest number of company projects behind it.

After some time, I rose to become a Senior Frontend developer, whose responsibilities included:

- Checking test assignments, conducting interviews.
- Code review, training/mentoring and full coordination of junior developers, organizing the work of several Frontend developers on projects.
- Requirements analysis, preparation of a work plan, decomposition and realistic estimates of the tasks provided.
- Project architecture design.

I usually had 2-3 developers under my auspices.

As a Frontend developer, I did the following:

- Development and support of client-side web

- applications for React/Next and Vue/Nuxt.
- Configuration of configs for various tools required during the development process.
 - Implementation of self-written modules to simplify the solution of various tasks (example: <https://www.npmjs.com/package/frog-modal>).
 - Authorization using access and refresh tokens.
 - Integration of payment systems.
 - Work with graphs.
 - SEO optimization and website performance optimization.
 - Adding metrics to projects, in particular, Yandex.Metrica
 - Angular project support

And much, much more.

Stack: Vue 2/3, Nuxt 2/3, React, Next, JavaScript/TypeScript, HTML, CSS, SCSS, CSS Modules, Pinia, Vuex, Zustand, Effector, Redux, Three.js, Bootstrap, Tailwind

Projects:

- | <https://ddair.tech>
- | <https://vr-technum64.ru>
- | <https://sector64.ru>
- | <https://foodzo.ru>
- | <https://manna-board.ru>
- | <https://cifra.ai>
- | <https://comfortel.pro/moskva>
- | [https://дом-коннект.рф /](https://дом-коннект.рф/)
- | <https://mx.vega-absolute.ru>
- | <https://solo365.ru>

I left on my own, because I just decided to move on.

EDUCATION

High school diploma or
GED in Mathematical
Physicist

Graduated in 2020

MBEI SGE №55

Barnaul

ADDITIONAL INFORMATION

LANGUAGES

Russian, English

ABOUT ME

About me:

- Commercial experience of more than 3 years
- I have worked on major projects under the leadership of "Gazprom Media" and on the SberMobile project under the leadership of Digital Agency "Dalee"
- I was the founder of Vue-development in one of the companies and was personally involved in its development and technology relevance support, writing npm-packages
- I had a lot of experience as a Frontend Team Lead: I personally recruited developers to the team, interviewed them, trained, advised and accompanied them on all projects
- I have a wide range of knowledge and skills, I have worked with many technologies (in particular, I have worked a lot on all three popular frameworks/libraries: Vue, React and Angular)

Soft skills:

- Independence
- Proactivity
- High communication skills
- Interest in developing and learning new things

Hard skills:

- | Vue 2/3
- | Nuxt 2/3
- | JavaScript
- | Typescript
- | HTML, CSS, SCSS/SASS, Less
- | Pinia, Vuex
- | Webpack, Gulp, Vite, Docker, nginx, certbot, Sentry, Git, GitLab CI/CD
- | WebSockets, socket.io
